Note: You can also read on your computer. Adobe Reader can be downloaded for free. Most systems with Android operating systems

## **HELP for loading .pdf files onto a NOOK**

The nook WILL read secure Adobe PDF and secure Adobe ePub files. This is how you do it. (*Note: These instructions do not address any possible technical support issues you may encounter. If you are having technical issues, support should come from Barnes and Nobel.*)

On your computer, perform the following steps:

1. Go to the .pdf file you saved on your computer. (Probably in the Downloads folder)
2. To get your eBook in ADE onto your nook plugged into your computer, you will see the nook on the left hand pane. Drag the eBook from the right hand pane to the nook icon in the left hand pane. The mouse cursor will show a green "+" (plus) symbol. Drop the eBook onto the nook. ADE will copy the file to your nook.
3. From Windows explorer, find the drive your nook device is connected to. Right mouse button click and "eject" the nook from your computer. (If you have an extra memory card on your nook, find the drive for that memory card and "eject" the memory card from your computer also. ALWAYS eject the nook and it's memory card from the computer.)
4. It is now safe to unplug the nook from your computer.

On your nook, perform the following steps:

From the main menu on the bottom bar, select, "My Library."

1. From "My Library," if you are not already in "My Documents," select that option.
2. Select "Check for new content."
3. You should see your newly purchased Adobe PDF book.

## **HELP for loading .pdf files onto a KINDLE**

1. Connect your Kindle Fire via external USB. For Windows users, this is typically in the "Computer" or "My Computer" menu. For Mac users, the drive will appear on the desktop.
2. Open the Kindle drive; you will see several folders inside. You may need to unlock your Kindle Fire device before it can be opened on your computer.
3. Locate the downloaded file and drag and drop it into the applicable content folder, such as Video, Music, or Pictures.
4. Safely eject your Kindle Fire from your computer and unplug the USB cable.

Your content will appear within the corresponding content library on your device:

Books will appear in the Books library.

Remember, your Kindle device will only recognize the files you've transferred if:

The PDF file type is supported by Kindle. Kindle1 is not supported.
